

"We really appreciate you being able to step in and help us out, that was much appreciated, and for your flexibility in being able to regularly catch up."

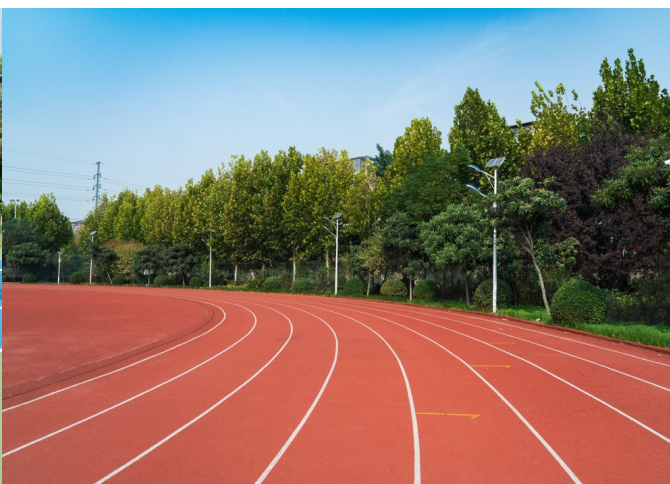

Sally Jeavons,
Director @Leisure

ONE OF OUR RECENT PROJECTS

@Leisure is promoting local communities through the use of web mapping.

Insight GIS are powering effortless GIS for the needs of today's local governments. Founded in 1989, we have a proven track-record of creating for our customers the optimum solution for their specific GIS needs.

ABOUT @LEISURE

@Leisure specialise in planning and designing public spaces and facilities to support active lifestyles and enhance leisure experiences across Australia. With its multidisciplinary team, @Leisure delivers a range of services to government, sports, and the parks and land development industry. The solutions they provide include: strategic plans for sports, open space and recreation infrastructure, facility plans, feasibility studies, master plans and design projects, and market modelling. They have completed over 900 projects and have considerable experience in market modelling, sports analysis and community engagement. @Leisure have a reputation for ensuring that financial, social and environmental objectives are met on each and every project.

WHY

When existing GIS resource availability is limited, it is reassuring for @Leisure to know they can call on Insight GIS to pick up a project—often at short notice—and to run with it to successful completion. @Leisure has partnered with Insight GIS on several projects and benefited from their expertise, in several Australian states. Consistently, Insight GIS brings to the table a wealth of GIS experience, skills and expert knowledge to source, interpret and map complex data.

BENEFITS

Insight GIS, consistently rise to the challenge in a professional and calm manner. Their technology and professional approach results in successful outcomes. @Leisure appreciated the fact that Mike was always contactable for queries and it gave them confidence, knowing that Rob was across the projects at every stage.

Where Council data and sophisticated, real-time mapping can be difficult to obtain, it is a comfort to @Leisure to know that Insight GIS can step in quickly and to be such a pleasure to work with. The Insight GIS solution is more than just mapping, it is complex, detailed data which is a win-win for @Leisure, their clients and ultimately, the whole community.

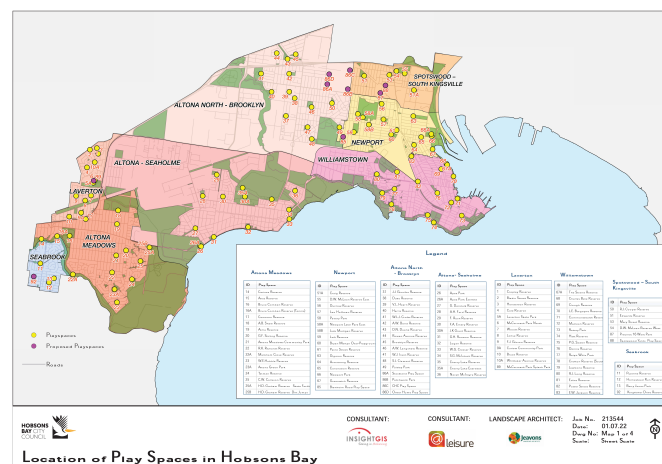

PROJECT SHOWCASE

Two examples of successful projects where @Leisure engaged Insight GIS were for Victorian Councils, Moonee Valley and City of Port Phillip. When their internal GIS resource had to move on to another time-critical piece of work and abandon a project that had run over, @Leisure called on Insight GIS to step in and complete the work. Both examples necessitated Insight GIS ramping up quickly and tested their ability to hit the ground running.

The projects required detailed isochrone and inventory mapping to ascertain the local facilities in order to determine the feasibility of play grounds and an open space strategy. Elements such as the location of schools, parks, community centres, community gardens, play grounds, bathrooms, transport, parking, and overall walkability, were mapped and analysed. With over 30 years of data experience, the Insight GIS output was second to none.

AWARD WINNING

Insight GIS has won the APSEA 'People and Community Award' (Tas) for the Local Links application. The Award recognises projects that make a difference to issues that affect communities via 'grassroots' initiatives.
